

OUTSTANDING FEATURES

PROFESSIONAL WALK-BEHIND-MOWERS

When your business depends on your mowers, it pays to invest in John Deere products. With their legendary build quality and practical features, plus outstanding service, John Deere mowers deliver excellent cut quality and productivity year on year. Why compromise?

POWERFUL ENGINE

The modern OHV engine has a 25 mm forged crankshaft (PRO 47V, JX90C, C52KS), ball-race main bearings and cast cylinder sleeves for long years of service. AutoChoke enables easier starting on cold mornings and the steady torque curve lets you work on inclines of up to 58% when conditions allow.

LOW VIBRATION

Work longer and safer with reduced vibration exposure to the operator thanks to the robust AntiVibrationSystem. You don't need to interrupt your working day.

The aluminium chassis has additional steel plate reinforcement on both the inside and outside for durability, meaning you don't have to worry about stones, dents, knocks and corrosion.

TURBOSTAR SYSTEM

Whatever the weather, the proven TurboStar System ensures a precision cut and great collection every time. Even in damp conditions, the air flow generated by the blade draws the grass up straight before cutting; it also removes leaves from your lawn. After cutting, the air vacuum blows the clippings into the collection bag smoothly and efficiently. The TurboStar Signal makes things even easier by alerting you in good time when the bag is almost full. (PRO 47V, JX90C, JX90CB)

Optimum bag fill: Thanks to the TurboStar System the collection bag gets filled up to 100%.

Smart move: The Blade Brake Clutch (BBC) stops the blade but not the engine. That makes it much easier to move your machine from A to B and saves time whenever you empty the collection bag. (JX90CB)

Robust metal wheels: The high quality metal wheels with rubber tyres ensure maximum grip and durability; reinforced flanks protect the wheels when you're mowing edges.

Tough transmission: The rugged gearbox lets you use the engine's high torque to the full in any setting. It has tough bronze / steel gears, a smooth, dual wrap spring clutch – and a diecast aluminium housing that stays cool when you're working hard.

NON-STOP MOWING

Up to eight hours without refuelling: the large 6 litre tank enables you to work for longer between stops. (JX90C, JX90CB, C52KS)

NO TOOLS REQUIRED

The handlebar folds down quickly for easy storage and transportation. (PRO 47V, JX90C, JX90CB, C52KS, PRO 53MV)

OPTIONAL

Mulching kit: For even more flexibility, all John Deere professional mowers can be converted into mulching mowers with an optional mulching kit.

OPTIONAL

Protection: A front bumper protects the mower deck (PRO 47V, JX90C, JX90CB). The optional engine guard (C52KS) is ideal when lifting or securing your mower or for protection when mowing under and around shrubs.

PROFESSIONAL MULCHING MOWER

DIFFERENT CONDITIONS

Easily adapt to your mowing conditions by adjusting the driving speed. Maximum efficiency, minimum effort.

RESILIENT

The durable PRO 53MV has full crankshaft protection. It can absorb the impacts and keep on working.

COMFORTABLE HANDLING

Mow close to trees, bushes and other obstacles without scratching your hands, guiding the mower with just one hand.

5,000 m²

53 cm Working Width

Briggs & Stratton

Variable-Speed: 2.6 – 4.1 km/h

- Foldable Handlebar
- AntiVibrationSystem
- Engine, Nominal Power: 3.2 kW / 2,800 rpm

The steel mower deck on our PRO 53MV mulching mower is so strong, we offer a 3-year warranty.

* Terms and conditions apply. See your John Deere dealer for details.

CUTTING ANGLE ADJUSTMENT

The height can be adjusted independently per axle for a more aggressive cut in tall grass.

SCARIFIER

The D45C Scarifier is designed for operators who require high levels of performance across larger areas of operation. The 19 steel blades, which provide a 45 cm (17.7 in) working width, aggressively removes unwanted material allowing your lawn to breathe and promote grass growth. The compact and well balanced design means that the D45C can be easily manoeuvred, particularly beneficial when operating in confined areas.
